United VMS 7.0

# Comprehensive Video Monitoring and Management

FLIR's United VMS 7.0 platform offers a fresh take on video operations management and control. The sleek and intuitive EZ Client web interface provides an optimized user experience and our video streaming technology for smart video tile display provides significant savings for bandwidth and workstation power. United VMS 7.0 debuts our new IP-mmune Cyber Defense Suite, designed to seal IT corporate grids from cyber penetrability through IP video networks. Discover the C.O.O.L. new features and user experience of United VMS 7.0.

## Latitude

Latitude is the preferred enterprise-level IP surveillance system with forensic-quality imaging and user-friendly operations consisting of dedicated web-based and mobile client software. Using the latest technology, Latitude is a powerful and versatile network video management system for organizations of all sizes. Latitude's scalable architecture can efficiently support systems of any size or architecture and be implemented throughout enterprises, across multiple sites, cities, and continents.

## Horizon

The Horizon NVR delivers best-in-class performance, stability, and unique price positioning for video installations requiring up to 128 cameras. Horizon is an ideal choice for securing high-performance small-to-medium sized business video installations with independent or multiple sites.

## Meridian

The Meridian NVR is a cost-effective, enterprise grade, off-the-shelf, plug-and- play video surveillance system for security installations configurable for 8, 16 or 24 cameras. The system includes a network video recorder with a built in 8 port PoE switch (additional 8-port PoE switch available for purchase), video management software that is pre-configured, support for the EZ Client web interface and works out-of-the-box with sophisticated viewing capabilities, eliminating the need for additional client workstations.

# Vertical Focus

## Smart solutions for safer cities

Imagine a city where citizens live without concerns about safety, a place with secure neighborhoods, where police and first responders, faced with dangerous or hazardous situations, use the latest technologies to make 'smart decisions' in real-time.

## All you need to secure your site

We understand your challenges in securing your critical infrastructure and protecting your perimeter. Our perimeter protection solutions are built with your unique requirements in mind.

---

FLIR provides field-proven innovation that is tailored for specific vertical markets. From mid-market to enterprise, our solutions are scalable, robust, and flexible. Visit our website to view case studies on our specific vertical market expertise.

# IP-mmune Cyber Defense Suite

## Search, Identify, Destroy

The transition from analog to IP has exposed the security industry to the risks that IT departments have faced for years. As more customers deploy comprehensive IP security solutions that incorporate multiple edge devices and platforms, it becomes more critical to ensure end-to-end IT security throughout the physical security network.

## PORTection

### Network Access Control

With cyber attacks constantly evolving, a single protection method is not always sufficient. In a case where an extremely sophisticated attacker works his way around a multi-layer protection, FLIR offers a solution that monitors and ensures that all devices connected to the video network are properly identified, authenticated, and comply with the organization's security policies.

Upon the detection of unauthorized devices, the system will either block, quarantine, or report these devices.

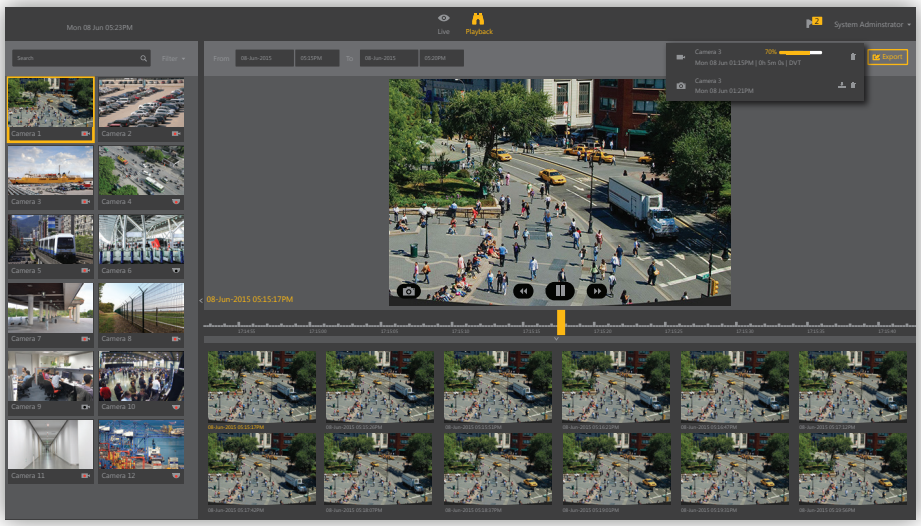
# Key Features of the Leading User Experience

## Highlights of the EZ Client

Brand new EZ Client with sleek and efficient interface, allows for effortless deployment, simple user experience, touch screen optimization and support on multiple operating sysems and browsers. With its interface and user experience similar to that of mobile devices, the EZ Client is intuitive and requires no training to use.

Optimized for touch functionality in an ongoing effort to take advantage of the use of modern technology and enhance the user experience.

Responsive design provides optimal viewing experience by allowing for fluid resizing and positioning of content based on the device type and screen shape.



Camera Catalog delivers thumbnail-based camera selection, allowing you to quickly and easily view the scene of your choice.

Thumbnail Search gives you smart splices of thumbnails based on the searchable time frame, allowing you to easily browse and accurately identify desired clips, and conveniently export the clips for forensic purposes.

## Highlights of the ControlCenter

Enhanced Search Capabilities allow operators to efficiently locate video evidence. Thumbnails and the zoom option highlight the region of interest, allowing the user to easily locate relevant footage by quickly browsing through time- and interval-based results.

# The Choice is Yours

## Optimize End-to-End with FLIR

Maximize the benefits of our video management platforms by using them with our superior quality Quasar HD IP cameras, reliable USS storage, and ioi intelligent video analytics.

## Integrate with Technology Partners

Supporting hundreds of edge device models from leading camera manufacturers, our VMS platforms have open architecture and are ONVIF Profile S-compliant. We also integrate with other third-party security systems and feature the most

# Select a Platform that Suits Your Needs

| Feature | Latitude | Horizon | Meridian |
|---|---|---|---|
| Number of Channels | Unlimited | 16-128 | 8, 16 or 24 |
